

ZYVOTRIX

AI-Powered DevOps Engineer

Certification Program · DOP

Master Cloud, Containers, Automation, Security & AI-Powered Operations

4 Months

Duration

4 Projects

Portfolio Builds

100+ Hours

Curriculum

WHY DEVOPS MATTERS TODAY

Faster delivery · Automation first · Better reliability · Cloud-native · AI productivity

Modern organizations demand faster deployments, reliable infrastructure, and scalable cloud systems. DevOps bridges development and operations through collaboration, automation, and continuous delivery — making it the most sought-after skill set in enterprise technology.

Traditional IT

- ✗ Slow, siloed releases
- ✗ Manual deployments
- ✗ Reactive incident response
- ✗ High failure rates

Modern DevOps

- ✓ Continuous delivery pipelines
- ✓ Automated infrastructure
- ✓ Proactive monitoring & SRE
- ✓ AI-assisted operations

Faster Delivery

Automation First

Cloud-Native

AI Productivity

Better Reliability

WHO IS THIS PROGRAM FOR?

Designed for anyone ready to build real DevOps skills — regardless of prior experience

Software Developers

Automate deployments and own your pipeline

System Administrators

Modernize infrastructure with IaC and cloud

Cloud Engineers

Scale expertise across Kubernetes and DevSecOps

Fresh Graduates

Launch your career with portfolio-ready projects

IT Professionals

Upskill into high-demand DevOps roles

Career Switchers

Enter tech with structured, mentor-led guidance

No prior DevOps experience required. Start from foundations and progress to advanced AI-powered operations.

CURRICULUM ROADMAP

A structured 4-month journey — from DevOps foundations to AI-powered operations

01

DEVOPS FOUNDATIONS

Month 1

DevOps Foundations & Cloud
Operations

02

CONTAINERS & CI/CD

Month 2

Containerization, Kubernetes & CI/CD

03

IaC & DEVSECOPS

Month 3

Infrastructure Automation & DevSecOps

04

AIOPS & SRE

Month 4

AI Operations, Observability & SRE

Each phase includes live mentor sessions, guided labs, and a portfolio project before advancing

PHASES & SKILLS

Job-ready skills using industry-standard tools and practices

Phase 1 — Foundations

- ▶ Linux & Bash Scripting
- ▶ Git & GitHub
- ▶ AWS IAM, EC2, S3, VPC
- ▶ GitHub Copilot

Phase 2 — Containers & CI/CD

- ▶ Docker & Kubernetes
- ▶ Helm Charts
- ▶ Jenkins & GitHub Actions
- ▶ Blue-Green & Canary Deploys

Phase 3 — IaC & DevSecOps

- ▶ Terraform & Ansible
- ▶ Vault & Secrets Management
- ▶ DevSecOps Practices
- ▶ Security Automation

Phase 4 — AIOps & SRE

- ▶ Prometheus & Grafana
- ▶ AIOps & AI Log Analysis
- ▶ Incident Response
- ▶ SRE & Cost Optimization

PORTFOLIO PROJECTS

Four production-grade builds that demonstrate real DevOps competency to employers

01

Cloud Infrastructure Automation Platform

Automate AWS provisioning using Linux, Bash, and networking fundamentals

02

Production Application Delivery Platform

Deploy containerized apps with Docker, Kubernetes, Jenkins, and GitHub Actions

03

Enterprise Infrastructure Automation Platform

Provision infrastructure at scale using Terraform, Ansible, and DevSecOps

CAPSTONE — AI-Powered DevOps Command Center

Capstone: K8s cluster, CI/CD, IaC, monitoring, security automation & AI incident assistant

Every project delivers: [Live Deployment](#) · [GitHub Portfolio](#) · [Architecture Docs](#) · [Security Review](#)

TOOLS YOU WILL MASTER

15+ industry-standard DevOps & AI tools — taught through live demos and project work

Linux

Git & GitHub

AWS

Docker

Kubernetes

Helm

Jenkins

GitHub Actions

Terraform

Ansible

Vault

Prometheus

Grafana

GitHub Copilot

ChatGPT

CAREER PATHS

YOU CAN PURSUE

DevOps Engineer

Cloud Engineer

Platform Engineer

Site Reliability Engineer

Infrastructure Engineer

Cloud Operations Engineer

Zyvotrix AI-Powered DevOps Engineer Certificate

Shareable on LinkedIn · Portfolio-ready · Earned upon completing all projects & capstone

WHY LEARNERS CHOOSE ZYVOTRIX

Built for Builders, Not Viewers

Live Mentor-Led Training

Expert guidance throughout your entire learning journey.

Project-Based Learning

4 real projects + capstone to showcase to employers.

AI-Integrated Curriculum

Copilot, ChatGPT & AI ops woven into every workflow.

Community Support

Learn alongside a vibrant community of cloud builders.

Career Guidance

Resume reviews, mock interviews & job search strategy.

Industry-Relevant Skills

Curriculum built by practitioners who ship to production.

Ready to Build Real DevOps Skills?

Master Linux, AWS, Docker, Kubernetes, Terraform, CI/CD, DevSecOps & AI-Powered Operations through practical, project-based learning.
