

ZYVOTRIX

# Data Science & Machine Learning with Python

Certification Program · DSP

*Built for international working professionals — not academic theory overload.*

Python

SQL

Analytics

Machine Learning

3 Months

Duration

11 Modules

Hands-on

6+ Projects

Portfolio Builds

# WHY DATA SCIENCE?

*Beyond Spreadsheets — Real Data Skills*

## High-Demand Skills

Hired across finance, healthcare, e-commerce, and tech. Python transfers everywhere.

## Analytics Thinking

Ask the right questions, explore systematically, and back decisions with evidence.

## Visualization Mastery

Matplotlib, Seaborn, and Streamlit dashboards for technical + business audiences.

## Machine Learning

Regression, classification, clustering with scikit-learn — predict outcomes from real data.

## SQL & Wrangling

SQL, NumPy, Pandas for extracting, cleaning, and preparing business datasets.

## Portfolio Projects

Notebooks, ML models, dashboards you can demo in interviews — not just certificates.

# PROGRAM OVERVIEW

*A structured 3-phase journey from Python + SQL to ML deployment*

Build 6+ real business projects and a deployed ML capstone — job-ready in 3 months.  
Weekend live sessions · 2 hrs/day · Mentor-led · Commitment ~7–9 hrs/week (realistic for full-time professionals).

**Duration** 3 Months (12 Weeks)

**Modules** 11 Hands-on Modules

**Projects** 6+ Portfolio Builds + Capstone

**Live Sessions** 4 Hours / Week

**Hands-On Practice** 3–5 Hours / Week

**Total Learning** 80+ Hours

**Certificate** Zyvotrix Certified Data Scientist & ML Professional (Python)

# THE ZYVOTRIX DIFFERENCE

*Watch Videos → Write Notebooks | Toy Datasets → Real Business Data*

| What You Need                   | Zyvotrix                                                | Typical Courses                      |
|---------------------------------|---------------------------------------------------------|--------------------------------------|
| Strong Python & SQL Foundations | Python, NumPy, Pandas & SQL from day one                | Assumes you already know programming |
| Hands-On Notebooks              | Jupyter labs every module                               | Slide decks with copy-paste examples |
| Statistics You Can Use          | Applied statistics on real business data                | Theory-heavy lectures                |
| Visualization Skills            | Matplotlib, Seaborn & Streamlit dashboards              | Basic charts only                    |
| Machine Learning Depth          | Regression, classification & clustering with evaluation | Black-box ML tutorials               |
| Portfolio Projects              | 6 progressive builds + ML capstone on GitHub            | Toy datasets                         |
| Mentor Feedback                 | Notebook reviews & career coaching                      | No feedback until final exam         |
| Career-Oriented Learning        | Beginner → Junior Data Scientist path                   | Unstructured video playlists         |

# CURRICULUM — 3 PHASES

*A structured 3-month learning journey — from foundations to deployed ML*

01

## FOUNDATIONS

Modules 1–4

- ▶ Python Fundamentals
- ▶ NumPy & Pandas
- ▶ EDA + Cleaning

▶ SQL Fundamentals  
*Adapt your datasets and generate business insights*

02

## ANALYTICS

Modules 5–7

- ▶ Applied Statistics
- ▶ Visualization
- ▶ Streamlit Dashboards

*Build KPI dashboards and tell data stories*

03

## MACHINE LEARNING

Modules 8–11

- ▶ ML Workflow
- ▶ Regression & Classification
- ▶ Clustering

▶ Deployment Portfolio  
*Deploy, evaluate, and improve ML solutions*

# PORTFOLIO PROJECTS

*6+ business builds + deployed ML capstone — portfolio-ready in 3 months*

01

## Retail Sales Analytics Dashboard

EDA · Revenue trends · Product performance

02

## HR Attrition Analytics

Statistics · Visualization · Retention insights

03

## Netflix Content Analytics

Storytelling · Seaborn · Trend discovery

04

## SQL BI Reporting System

Joins · KPIs · Executive reporting

05

## House Price Prediction

Regression · Feature engineering · Evaluation

06

## Customer Segmentation Engine

K-Means · Profiling · Recommendations

## Capstone: Customer Churn Prediction Platform

End-to-end ML + Streamlit deployment

Every build delivers: Notebook + Insights · Dashboard · ML Model · GitHub Portfolio

# TECH STACK + SKILLS

*Python tools + job-ready data skills you'll demonstrate in your portfolio*

## Tools You'll Master

Python

Jupyter

VS Code

Git

GitHub

SQL

Streamlit

### Analytics + Dashboards

- ▶ Stats
- ▶ Visualization
- ▶ Business KPIs
- ▶ Streamlit apps

### Python + Data Wrangling

- ▶ NumPy
- ▶ Pandas
- ▶ Data cleaning
- ▶ EDA

### Machine Learning

- ▶ Regression
- ▶ Classification
- ▶ Clustering
- ▶ Model evaluation

# CAREER OPPORTUNITIES

*Roles this program prepares you for*

Data Analyst

Junior Data Scientist

Business Analyst

ML Engineer (Entry)

Analytics Engineer

BI Analyst

Research Analyst

Zyvotrix Certified Data Scientist &  
ML Professional (Python)

LinkedIn-ready certificate · PDF + badge · Capstone review · Portfolio coaching

# Ready to Become a Data Scientist?

## Learn. Analyze. Predict.

*Join the Data Science & ML with Python program — 6+ business projects, deployed ML capstone, job-ready skills in 3 months.*
